DETAILED ACTION

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest a process for the preparation of a metal doped, pentasil zeolite comprising the step of preparing a mixture comprising sources of aluminum and silicon, wherein at least one these sources is doped with a rare earth metal, or a transition metal of Groups Vb-VIIIb, Ib, or IIb, in combination with the other features instantly claimed.

The examiner regards US 6,346,224 and US 5,869,021 as the closest prior art. US 6,346,224 discloses the preparation of an MFI metalloaluminosilicate wherein the precursor mixture comprises a silicon solution, an aluminum solution, and an acid solution of a metal other than silicon or aluminum. Refer to columns 3-7. US 5,869,021 discloses a ZSM-5/ZSM-11 co-crystalline zeolite which contains a rare earth metal. The reference teaches that the synthesis is conducted in the presence of a water glass solution, an aluminum source, a mineral acid, and a salt of a rare earth metal. Refer to columns 3-4 and Examples. Neither reference teaches or suggest doping the silicon and/or aluminum with a metal prior to forming the synthesis solution.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
